03

How to Register an Auction - Introduction

There are three different types of Auctions, Live Webcast, Real-Time Online and Timed Auctions

3.1 Live Webcast Auctions

This type of Auction is when an Auctioneer is hosting the Auction and bidders want to participate in online bidding instead of being present at the Auction venue. The bidding is live and interactive with the Auctioneer. The hall bidding and streaming of the Auction is simultaneously available.

3.2 Real-Time Auctions

This type of Auction is when an Administrator is controlling the opening and closing of the bids. All bidding takes place online and the lots will close in number sequence.

3.3 Timed Online Auctions

This type of Auction is 100% controlled by the bidders. Auction time is over a period of day/s and bidding can take place on all lots simultaneously. Each lot has a certain time of closing and therefore lots do not necessarily close in number sequence.

	Terms and Conditions	
Name *	-- Select Name --	

03 How to Register an Auction

3.1 Insert Auction information for Live Webcast

- Auction Type:**

This selection will limit what the user can load on the front end. By selecting for example, Plains Game, the user will only be able to load the species under plains game with all the sub-categories.

When it is a combination of game on auction – then select Game Sales or when hunting packages are included select All Game and Hunting sales

- Layout is applicable to the type of bidding:**

- Standard Layout bidding is in per unit or per lot.
- Complex Layout bidding is in per unit or per lot or per kg.

This can be changed before the start of the auction, but it is preferable to select the type of layout (bidding) before any lots are loaded.

- All Game and Hunting Sales
- Assets and Movables Sales
- Carcass Sales
- Game Sales
- Hunting Packages Sales
- Plains Game Sales
- Rare Game Sales
- Terms and Conditions

03 How to Register an Auction

3.2 Insert Auction information for Real-Time Online Auction.

- Auction Type:**

This selection will limit what the user can load on the front end. By selecting for example, Plains Game, the user will only be able to load the species under plains game with all the sub-categories.

When it is a combination of game on auction – then select Game Sales or when hunting packages are included select All Game and Hunting sales

- Layout is applicable to the type of bidding:**

- Standard Layout bidding is in per unit or per lot.
- Complex Layout bidding is in per unit or per lot or per kg.

This can be changed before the start of the auction, but it is preferable to select the type of layout (bidding) before any lots are loaded.

03 How to Register an Auction

3.3 Timed Online Auction

Timed Online Auction Registration Details

Name Of Auction:	<input type="text"/>
Date Of Auction:	<input type="text"/>
Auction End Time:	<input type="text"/>
Upload Terms and Condition:	<input type="button" value="Choose file"/> No file chosen
Upload Catalogue:	<input type="button" value="Choose file"/> No file chosen
WebSite Address:	<input type="text"/>
Auction Type:	<input type="button" value="--Select--"/>
Layout:	<input type="radio"/> Complex <input checked="" type="radio"/> Standard

03 How to Register an Auction

3.3 Insert Auction information for Timed Online Auction.

- **Name of Auction** (Limited to 21 characters).
- **Date of Auction** (Date and time when Auction will start).
- **Auction end time:**

This time refers to the time that the Auction will close, no matter if all lots are closed or not. Take the number of lots and multiply that by the minute interval between lots and add one hour.

Example: 15 lots closing 2 minutes apart is 30 minutes plus one hour – closing time 12h30.

(This can at any time be edited)

04 Loading Auction Sellers

If the seller already has profile on the system check that all information is correct for the seller:

- Click on the seller's name and check all info already in the system
- If you need to edit/update any info select the paper & pencil icon on the right of the page and then edit/update the info and save

04 Loading Auction Sellers

If the seller does not exist in the database, you will need to add the seller as a brand-new user

- Select Add New User at the top right of the page
- Complete all information required to add the seller

NB! FICA documents can be uploaded on this page, and an expiry date can be added to ensure that the user regularly updates his FICA document

A logo is required for each seller as the logo will be printed on the catalogue, ensure that sellers have the correct logo loaded before adding/linking the seller to the auction
