02 My Profile

- Go to **Load Live Webcast Auction** or **Load Real-Time Online Lots** and Select the type of lot you want to load.

- **Mixed Category**

Use this option when you want to load a lot with different Categories/Species (Ideal for Grand slams or Hunting Packages). For example, 1 x Impala, 1 x Blue Wildebeest, 1 x Sable, 2 x Warthogs to be sold as either Per Unit or Per lot.

- **Single Species (Single animal)**

Use this option when you want to load any specie, any quantity can be inserted but only have the option to load one set of additional information.

- **Single Specie (More than one animal)**

Use this option when you want to load Sables or Buffalo for example, quantity is limited to 5 but you have the option to load a set of additional information for each animal.

03 Generic loading of information for all types of
LOT loading

03 Generic loading of information for all types of LOT loading

Part of Standard Printing of Catalogue

- **Auction Name** refers to the auction that was loaded by admin. This will reflect on all pages as auction name and reference to the auction.

- **Main Lot Number:** You can choose any format of loading. When starting when 1, ensure to use 001 for exporting and editing to be in sequence. Can also have lot 001A, 001B etc.
- **Seller of Lot:** If the Seller is not in the dropdown ask the Administrator to activate or create the Seller in Admin.

- **Pricing Principles of Lot** is extremely important. This is the method that the lot will sell for. This will determine if the lot is sold as Per Unit (price x qty or animals) or Per Lot (price for all animals in lot)

03 Generic loading of information for all types of LOT loading

- **Hold in Boma** and **On Catalogue**: When Hold in Boma is **Yes**, then On Catalogue is **No**.

A dropdown menu with a yellow background and a dark border. The text inside is white and lists three options: "Select", "Yes", and "No". A small downward-pointing arrow is visible in the top right corner of the menu.

- **Hold in Boma** refers to the animal on auction being physical at the auction premises and ready to load upon payment.
- **On Catalogue** refers to an animal that is still on the Sellers farm and loading dates to be confirmed.
- **Delivery Date:**
 - **Hold in Boma** will always be Subject to Payment.
 - **On Catalogue** will be Subject to Confirmation.
- **Delivery Cost Included and Delivery Cost Excluded:**
 - Does the Seller arrange transport on behalf of the Buyer and include a certain range of km's for free.
 - If Yes, capture Free KM incl. in bid price.

A dropdown menu with a yellow background and a dark border. The text inside is white and lists three options: "Select", "Yes", and "No". A small downward-pointing arrow is visible in the top right corner of the menu.

7.1 Activation of Live Webcast Auction Lots

- Setting Opening Bids and Intervals for each lot to give the administrator a bit of breathing space when online bidding is very fast.
- Select the auction and the Lot Selection “**All**” and click on **Submit**.
- Select the Increment Value & Lot Intervals for each to from the dropdown provided in order for bidding to run is the desired bidding sequins.
- Insert your target price, this will only be visible to the administrator and the auctioneer to ensure that we get to the target as quick as possible.
- Insert the Opening Bid per lot, this is the first automatic bid of each lot as soon as it opens, normally $\pm 70\%$ of the Target Price. Opening bids are there to assist with getting to the target price faster.
- Auctioneer notes can also be added to each lot, this is a **short** note to assist the auctioneer with top lots and special information on a
